

Table 1. Sample Characteristics, General Social Survey (2012), N= 1080

			Items for Physician Distrust Scale (multiple items)					
			Trusted	Discuss	Skills	Earnings	Mistake	
Support for immigration restriction								
Increased a lot	4.2%		Strongly agree	7.4%	7.3%	4.8%	7.3%	3.2%
Increased a little	9.3%		Agree	52.1%	35.0%	28.1%	20.5%	19.6%
Remain the same	34.3%		Neither agree nor disagree	21.9%	18.3%	25.7%	28.1%	20.4%
Reduced a little	26.3%		Disagree	13.7%	32.3%	33.2%	35.1%	40.0%
Reduced a lot	23.9%		Strongly disagree	2.9%	4.3%	3.5%	6.2%	12.8%
Can't choose ^a	1.7%		Don't know ^a	1.9%	2.6%	4.4%	2.7%	3.9%
No answer ^a	0.5%		Can't choose ^a	0.2%	0.2%	0.01%	0.01%	0.01%
Age (years)	50.1 (SD=17.1)	1.48% missing	Physician distrust scale		0.0000 (SD=0.68)			
					Range: -1.9 to 2,0			
Education (highest grade)	13.8 (SD=3.0)	0.1% missing						
Family income (thousands)	36.8 (SD=40.7)	10.6% missing						
Female	58.30%							
Race			Foreign-born	9.5%				
White	77.8%		Unemployed	5.8%	2.9% missing			
Black	15.3%							
Other	7.1%		No health insurance	15.6%	0.6% missing			
Conservatism								
Extremely liberal	3.3%		Health Status					
Liberal	13.9%		Excellent	14.4%				
Slightly liberal	9.7%		Very good	30.4%				
Moderate	35.7%		Good	31.9%				
Slightly conservative	14.4%		Fair	18.9%				
Conservative	15.4%		Poor	4.3%				
Extremely conservative	5.0%		Don't know ^a	0.2%				
Don't know ^a	2.1%		No answer ^a	0.0%				
No answer ^a	0.4%							

Mean values (standard deviations (SD) in parentheses) for continuous measures.

^aResponse coded as missing.

Table 2. Survey-weighted models estimating physician distrust, by immigration restriction support and controls

	Multiple item physician distrust			Single Item
	(1)	(2)	(3)	(4)
Support for immigration restriction	0.0773*** (0.0189)	0.0704*** (0.0197)	0.0648** (0.0200)	0.175** (0.0575)
Age		0.000488 (0.00121)	0.00051 (0.00132)	-0.00569 (0.00380)
Education (highest grade)		-0.0107 (0.00744)	-0.00723 (0.00769)	-0.0635** (0.0223)
Family income (thousands)		-0.00000108* (0.000000549)	-0.000000750 (0.000000557)	-0.000619 (0.00162)
Female		0.0563 (0.0421)	0.0528 (0.0427)	0.340** (0.122)
Race ^a				
Black		0.0982 (0.0588)	0.0874 (0.0585)	0.570*** (0.165)
Other race		0.0726 (0.0876)	0.0564 (0.0877)	0.303 (0.250)
Foreign-born		-0.0686 (0.0765)	-0.0634 (0.0768)	-0.251 (0.218)
Conservatism			-0.00222 (0.0143)	0.0342 (0.041)
Unemployed			-0.00772 (0.0104)	-0.0186 (0.0297)
No health insurance			0.00285 (0.0126)	-0.0137 (0.0356)
Poor health			0.0838*** (0.0203)	0.186** (0.0588)
Constant	-0.277*** (-0.0709)	-0.06637 (-0.1802)	-0.3311 (0.2047)	(omitted)
F-statistic	16.69***	4.302***	4.685***	
Observations (N)	1080	1080	1080	1080

Data: General Social Survey (2012)

Standard errors in parentheses.

Models (1)–(3) utilize an ordinary least squares (OLS) regression models estimating a physician distrust scale constructed from multiple items, and Model (4) utilizes an ordinal logistic regression model estimating a single-item physician distrust measure

^aWhite (reference category).

***p < 0.001; **p < 0.01; and *p < 0.05 (two-tailed)
